

CareLink is a cloud based software product that was developed as a practice management tool tailored for mobile medical practice.

CareLink is not an EMR, it is a practice management and collaboration tool which allows you to interact electronically with patient's care givers, assisted living homes, group homes, doctors' offices, and others who are managing the care of a large group of patients within your practice.

CareLink also has powerful scheduling and administrative tools to improve your office workflow.

## CareLink Integrates With

# Introducing CareLink Mobile Practice Manager

**Finally!  
A Practice Management  
Solution Built from the  
Ground Up for Mobile  
Providers**
